

RHAMNOSE

L (+) Rhamnose, bacteriological grade

FORMULA

C₆H₁₂O₅

DESCRIPTION

Bacteriological grade L (+) Rhamnose is used in microbiological culture media as fermentable carbohydrate.

TYPICAL ANALYSIS

Appearance	white or light yellow powder
Optical rotation (dry basis)	+ 8,3°
Density (g/cc)	0.52
Moisture	9.9 %
Sulphated ash (% on dry basis)	0.07 %
Purity TLC	spot singolo
Purity HPLC	99,06
Melting point	90.8 °C

STORAGE

Room temperature

PACKAGING

4125051 Rhamnose 100 g
